

Integrated Computer-Aided Engineering

Aims and Scope

Integrated Computer-Aided Engineering was founded in 1993. "Based on the premise that interdisciplinary thinking and synergistic collaboration of disciplines can solve complex problems, open new frontiers, and lead to true innovations and breakthroughs, the cornerstone of industrial competitiveness and advancement of the society" as noted in the inaugural issue of the journal. The focus of ICAE is the integration of leading edge and emerging computer and information technologies for innovative solution of engineering problems. The journal fosters interdisciplinary research and presents a unique forum for innovative computer-aided engineering. It also publishes novel industrial applications of CAE, thus helping to bring new computational paradigms from research labs and classrooms to reality. Areas covered by the journal include (but not limited to) artificial intelligence, advanced signal processing, biologically inspired computing, cognitive modeling, concurrent engineering, database management, distributed computing, evolutionary computing, fuzzy logic, genetic algorithms, geometric modeling, intelligent and adaptive systems, internet-based technologies, knowledge discovery and engineering, machine learning, mechatronics, mobile computing, multimedia technologies, networking, neural network computing, object-oriented systems, optimization and search, parallel processing, robotics virtual reality, and visualization techniques. The primary focus of the journal is novel computational modeling. Papers describing software development projects are not suitable. Papers integrating multiple fields in a novel way are particularly welcome.

Editorial Advisory Board

A. Akay (USA), C.Y. Chang (Taiwan), T.S. Dillon (Australia), J. Dongarra (USA), M. Gini (USA), E.M. Greitzer (USA), M.F. Iskander (USA), T. Itoh (USA), W. Kuo (Hong Kong), A. Kusiak (USA), M. Morari (Switzerland), C.D. Mote (USA), L. Motus (Estonia), H. Mousavinezhad (USA), M.E. Pate-Cornell (USA), C.V. Ramamoorthy (USA), J.N. Reddy (USA), Rice (USA), C. Ruggiero (Italy), G. Salvendy (USA), M.S. Shephard (USA), M. Shur (USA), M.A. Simaan (USA), H.T.Y. Yang (USA) and L.A. Zadeh (USA)

Call for Papers

Please email to the Editor-in-Chief

1) a statement that this manuscript is your "original unpublished work and the manuscript or any variation of it has not been submitted to another publication previously." 2) the pdf and Word files of your paper prepared according to the journal template (available on the journal web site). 3) The names, affiliations, and full contact information including email addresses of six to ten (preferably ten) leading researchers who have published in the subject area of the paper outside your country (They should not be your advisor, advisee, research sponsor, or research collaborator. They can include senior researchers cited in your paper.). 4) Conscientious Reviewer form for each author (except students) (available on the journal web site).

Subscription Information

Integrated Computer-Aided Engineering (ISSN 1069-2509) will be published in 1 volume of 4 issues in 2010 (Volume 17). Institutional subscription (print and online): €528 / US\$735 (including postage and handling). Institutional subscription (online only): €490 / US\$680

Abstracted/Indexed in

Cambridge Scientific Abstracts, COMPENDEX PLUS, CompuMath Citation Index, CompuScience, Current Contents®/Engineering, Computing and Technology, EBSCO's database, INSPEC database, ISI Alerting Services, MasterFILE, PaperChem, Science Citation Index Expanded (SciSearch®), SCOPUS, Zentralblatt MATH.

About the Editor-in-Chief

HOJJAT ADELI is the holder of the Abba G. Lichtenstein Professorship at The Ohio State University. A contributor to 74 different research journals he has authored over 440 research publications, including 14 books, and edited 13 books since he received his Ph.D. from Stanford University in 1976 at the age of 26. He has presented Keynote/Plenary Lectures at 74 national and international computing conferences held in 40 different countries, and has organized or served on the advisory board of over 300 national and international conferences held in 59 different countries. He is the recipient of numerous awards and honors including, the University Distinguished Scholar Award given by The Ohio State University in 1998 "*in recognition of extraordinary accomplishment in research and scholarship*". He is also the quadruple-winner of the OSU College of Engineering Lumley Outstanding Research Award. In September 1998 he was awarded a United States patent for his neural dynamics model for design automation and optimization (jointly with a former Ph.D. student). In 2005 he was elected a Distinguished Member of American Society of Civil Engineers "*for wide-ranging, exceptional, and pioneering contributions to computing in engineering and extraordinary leadership in advancing the use of computing and information technologies in engineering disciplines throughout the world.*" He received the ASCE Construction Management Award in 2006. In 2007 he received the Peter L. and Clara M. Scott Award for Excellence in Engineering Education *for sustained, exceptional, and multi-faceted contributions to numerous fields including computer-aided engineering, knowledge engineering, computational intelligence, large-scale design optimization, and smart structures with worldwide impact*, Charles E. MacQuigg Outstanding Teaching Award from The Ohio State University College of Engineering. In 2008, he was elected a Fellow of the American Association for the Advancement of Science, "*for distinguished contributions to computational infrastructure engineering and for worldwide leadership in computational science and engineering.*"
